

## Hauptseminar Theorie kondensierter Materie

| Date   | Name             | Topic                                         | Please Contact |
|--------|------------------|-----------------------------------------------|----------------|
| 07.05. | Stefan Reich     | Noise-induced Phenomena                       | B              |
| 14.05. | Mantas Simenas   | Monte Carlo Simulations or Scaling in Biology | K              |
| 04.06. | Steven Huth      | Swimming at low Reynolds-Numbers              | K,B            |
| 11.06. | Lydia Reuter     | DNA Mechanics                                 | K              |
| 18.06. | Felix Schramm    | Game Theory                                   | B              |
| 25.06. | Vitaly Zviagin   | Statistical Methods                           | B              |
| 02.07. | Tobias Thalheim  | Cell Biophysics                               | K              |
| 09.07. | Makumbi J. Msasi | Population Dynamics                           | B              |
| 16.07. | Anna Suranova    | Membranes/Dynamics                            | K              |

B: Prof. U. Behn

K: Prof. K. Kroy
